ICD-10 in AdvancedMD EHR

Andrew Smith - 2015-09-29 - ICD10

AdvancedMD has made some changes to their EHR to help offices complete charge tickets. Here is a list of instructions on how you can easily choose and add ICD-10 codes to tickets. *To complete this, you must make sure you open your chart note as a linked item to the <i>appointment.* Then, fill out your note as you normally would and follow these instructions to complete your charge ticket.

1. When in the Assessment and Plan section of your note, you will use the ICD selector to find codes. You can also select your CPT codes by clicking on the CPT selector.*

*The CPT selector allows you to search by CPT code, description, or select Chart Items. You should select your CPT codes here as well:

2. Once the ICD selector has opened, you can choose from 4 different methods to find ICD codes. In the search option, you can use descriptions or conditions to search, not just specific codes.

8. The resulting template will only contain those CPT and ICD codes which were chosen in the Assessment and Plan section of the note. This makes it easy to add them to the charge ticket without more searching.

9. Simply select the CPT and ICD codes to add them to the charge summary. Once complete, save and sign the ticket.
