## **New Problem List Selector**

Andrew Smith - 2025-09-15 - Archive

## How to Use the New Problem List Selector

The following instructions will show you how to use the new problem list selector which has been updated in AdvancedMD EHR.

Now, when searching for problems to add to the list, you will see the new Problem Selector.

ite:	12/19/2014		Status:	Chronic	~	12/19/201	4
							Q >
ts:	Problem S	elector				×	
						Q	
					 		8

Instead of searching by ICD-9 code, you will have to enter the name of the problem. Once you have entered the name, a list of possible problems will appear so you can select the one for which you are looking.

:Date:	12/19/2014 Status: Chronic	12/19/2014			
em:		Q			
nents:	Problem Selector	×			
	hypertension	×Q			
	FH: Hypertension				
	No FH: Hypertension				
	H/O: hypertension				
	Hypertension risk				
	BP+ - Hypertension				
	HT - Hypertension				
	HTN - Hypertension				
	Fear of hypertension				
	Hypertension				
	Hypertension with ESKD				
	Hypertension with ESRD				
	Hypertensive LVH				
	Hypertensive RF				
	OH - Ocular hypertension				
	Hypertension resolved				
	Neonatal hypertension				
	Venous hypertension				
	Maternal hypertension				
	Benign hypertension				
	Portal hypertension				

Once you click on the problem you are searching for, more specific choices relating to the problem will appear.

Hypertension		×
Hypertensive disorder	38341003	
Malignant hypertension	70272006	^
Hypertensive complication	449759005	
Hypertension complicating pregnancy, childbirth	198941007	
Hypertension complicating pregnancy, childbirth	198941007	
Postpartum state	86569001	
Hypertension complicating pregnancy, childbirth	198941007
